At Meta, we strive to give people the power to build community and bring the world closer together. Our data centers, like the one in Huntsville, Alabama, help bring that mission to life by enabling billions of people around the world to connect every day. Beyond their role as the physical backbone of our apps and services, Meta’s data centers drive significant positive impact in the communities where they are located and beyond.

**ECONOMY**

We help grow and diversify local economies by supporting new jobs, sourcing from local vendors and generating revenue for municipalities.

From 2010 to 2019, Meta invested more than $16 billion in U.S. data center construction and operations, which supported over 238,000 jobs with $16.4 billion in earnings flowing into local economies.

**COMMUNITY**

We support community vitality by investing in local schools, nonprofits and community projects.

Since 2011, Meta has contributed more than $24 million in direct funding to U.S. data center communities, as well as volunteer time, to provide technology for community benefit, connect people online or off and improve STEM education.

**SUSTAINABILITY**

We build and operate some of the world’s most sustainable data centers and add new renewable energy to each data center’s local grid.

Meta data centers have achieved net zero carbon emissions, are LEED® Gold level certified and supported by 100% renewable energy. They use 32% less energy, are 80% more water-efficient on average than industry standard, and we’re committed to restoring more water than we consume by 2030.

---

**Huntsville Data Center**

**Investment:** $1.5 billion+

**Broke Ground:** 2018

**Online:** 2021

**Anticipated Jobs:** 300+ supported

**Construction:** 1,300 workers on site per day at peak

**Size:** Approximately 3.5 million square feet

**Energy:** Supported by 100% renewable energy
Partnering With Huntsville

Meta is proud to call Huntsville home and prouder still of our partnership with the community and what we’ve been able to accomplish together. Whether through volunteering at local schools or contributing to local nonprofit organizations, we’re committed to strengthening the community of Huntsville.

So far, we’ve provided over $2.6 million in community support, enabling:

- **The Raise Your Hand** program to work toward their goal of adding 500 new National Board Certified Teachers to the Huntsville City, Madison City and Madison County school systems
- **Madison County Schools** to provide technology devices to each student and allowing the district to install mobile Wi-Fi on 90 school buses
- **Alabama School of Cyber Technology and Engineering** to purchase new STEM equipment for the school
- **Community Foundation of Greater Huntsville Racial Equity Fund** to issue grants to local nonprofit organizations
- **Fantasy Playhouse** to offer enhanced STEAM learning in the community through their technical theater lab
- **Boys & Girls Clubs of North Alabama** to enhance learning opportunities by providing new technology equipment, like 3D printers and computers, for their Huntsville Club locations
- **COVID-19 relief grants to over 50 small businesses in Madison County** in partnership with Neighborhood Concepts

Other community partners include:

- Girls Inc. of Huntsville
- Huntsville City Schools
- Huntsville Hospital Foundation
- Madison City Schools

New Renewable Energy Investments

By supporting our data centers with 100% renewable energy, we are making additional contributions to local economies through investments in new wind and solar projects. Meta will add more than 6,400 MW of new renewable energy to the U.S. grid, representing $3.3 billion in infrastructure investment.

Meta worked with the Tennessee Valley Authority to meet our renewable energy goals for the Huntsville Data Center. This includes creating an innovative renewable energy program (Green Invest) that is available to other customers looking to meet similar renewable energy commitments.

Meta-contracted projects will add 447 MW of new renewable energy to support the Huntsville Data Center. Meta-supported renewable energy projects in Alabama represent $75 million in local investment. These projects support jobs across the state, including 450 jobs in the construction phase and 30 annual operational jobs.

Meta’s fleet of data centers powers our apps and services, including Facebook, Instagram, Messenger, Meta Quest and WhatsApp. In 2011, we opened the first Meta-owned and -operated data center in Prineville, Oregon. Since then our fleet has grown to 17 U.S. data centers and 21 worldwide, 13 of which are currently serving traffic.
