Meta Data Centers

At Meta, we strive to give people the power to build community and bring the world closer together. Our data centers, like the one in Sarpy County, Nebraska, help bring that mission to life by enabling billions of people around the world to connect every day. Beyond their role as the physical backbone of our apps and services, Meta's data centers drive significant positive impact in the communities where they are located and beyond.

ECONOMY

We help grow and diversify local economies by supporting new jobs, sourcing from local vendors and generating revenue for municipalities.

From 2010 to 2019, Meta invested **more than $16 billion** in U.S. data center construction and operations, which supported **over 238,000 jobs with $16.4 billion in earnings** flowing into local economies.

COMMUNITY

We support community vitality by investing in local schools, nonprofits and community projects.

Since 2011, Meta has contributed **more than $24 million in direct funding** to U.S. data center communities, as well as volunteer time, to provide technology for community benefit, connect people online or off and improve STEM education.

SUSTAINABILITY

We build and operate some of the world's most sustainable data centers and add new renewable energy to each data center's local grid.

Meta data centers have achieved net zero carbon emissions, are **LEED® Gold level** certified and supported by **100% renewable energy**. They use **32% less energy**, are **80% more water-efficient** on average than industry standard, and we're committed to restoring more water than we consume by 2030.

Sarpy Data Center

Investment: $1.5 billion+

Broke Ground: 2017

Online: 2019

Anticipated Jobs: 300+ supported

Construction: 2,000 workers on site at peak

Size: 4 million square feet

Energy: Supported by 100% renewable energy

Partnering With Sarpy County

Meta is proud to call Sarpy County home and prouder still of our partnership with the community and what we've been able to accomplish together. Whether through volunteering at local schools or contributing to local nonprofit organizations, we're committed to strengthening the communities of Sarpy County.

So far, we've provided **over $2.5 million in community support**, enabling:

· **STEM education support** for all four Sarpy County school districts through our annual Community Action Grants program

· Partnership with the **Papillion Community Foundation** to equip Papillion Landing with a 3D printer and other technology for their new digital library

· Remote learning at **Springfield Platteview and Papillion La Vista Community Schools** by providing hundreds of laptops and Wi-Fi hotspots to support resilience and bridge the digital divide

· **COVID-19 relief grants** for over 100 local small businesses and nonprofits through partnerships with the Midlands Community Foundation and the Sarpy County Chamber of Commerce

Other recipients include:

· Gifford Farm Education Center, ESU #3
· Sarpy Community YMCA
· Omaha STEM Ecosystem

· Girl Scouts Spirit of Nebraska
· Sarpy County Museum
· Springfield Memorial Library

New Renewable Energy Investments

By supporting our data centers with 100% renewable energy, we are making additional contributions to local economies through investments in new wind and solar projects. Meta will add **more than 6,400 MW of new renewable energy to the U.S. grid**, representing **$3.3 billion in infrastructure investment**.

Meta worked with Omaha Public Power District to meet our renewable energy goals for the Sarpy Data Center, using a framework that enables large customers to support their operations with renewable energy.

This Meta-contracted project will **add 318 MW of new renewable energy** in Nebraska. This renewable energy project represents **over $118 million in local investment** and will support more than 850 construction jobs. Project operations will support 20 jobs annually across the state.

For more information, please visit facebook.com/SarpyDataCenter.

Meta's fleet of data centers powers our technologies and services, including Facebook, Instagram, Messenger, Meta Quest and WhatsApp. In 2011, we opened the first Meta-owned and -operated data center in Prineville, Oregon. Since then our fleet has grown to 17 U.S. data centers and 21 worldwide, 13 of which are currently serving traffic.
